Detailed Action

Allowed Claims

Claims 1-13 are allowed over the prior art of record.

Response to Arguments

Applicant's amendment filed 9/24/07 is sufficient to overcome the 35 U.S.C. 112 rejections of the previous office action. Therefore, the rejection has been withdrawn.

Reason for Allowance

The instant claims are drawn to phenylcarboxylate beta-secretase inhibitors for the treatment of Alzheimer's disease, with the following base structure:

Art Unit: 1621

The closest prior art is Coburn et al. (J. Med. Chem. 2004, 47, 6117-6119).

Coburn et al. teaches β -secretase inhibitors for the treatment of Alzheimer's disease.

The compounds are based on a aminopentyl oxyacetamide structure (page 6118, table 1).

Coburn et al. is deficient in the sense that it does not teach applicant's particular phenylcarboxylate inhibitors with the limitations as stated in the instant claims.

Coburn et al. neither teaches, nor suggests the limitations of claim 1 as described above. Nor would it have been obvious to modify Coburn et al.'s process to arrive at the instantly claimed invention. There is no motivation to do so.
